Monthly Update / Laporan Bulanan Terkini

Market Review

The Malaysian equity market ended the last month of 2024 on a positive note, and December has been a positive month for the KLCI for the last 10 years in a row. This was despite foreign investors were net sellers in December 2024 for the third consecutive month, bringing YTD cumulative net foreign outflow of RM3.7bil, and the second consecutive year of outflows (2023: -RM2.4bil). The month of December was a fairly quiet month. The signing of the JSSEZ was delayed from 9 December 2024, as Singapore's Prime Minister was infected with COVID-19. The KLCI included two new constituents, Gamuda and 99 Speedmart, to replace Genting Malaysia and Genting Berhad in the index. In 2024, the KLCI gained 12.9%, which is the highest annual gain since 2010. The FBM EMAS Shariah Index closed the month at 12,590.57, up 4.62% MoM. The FBM Small Cap Shariah index rose 4.17% for the month and underperformed the FBM EMAS Shariah Index.

Market Outlook

January 2025 could be a month of volatility. At the start of the year, we were informed that there was a small terrorist attack in the US, which may or may not be related to the incoming President-Elect Trump. Expect investors to stay on the sidelines closer to January 20, 2025, which is the day of the US Presidential inauguration. On the domestic front, the much-awaited Johor-Singapore Special Economic Zone was supposed to be finalized on 6 January 2025, with the meeting of the two countries' leaders, which had been postponed as Singapore's Prime Minister had contracted Covid in December 2024. News flow from that event should be positive for Malaysia. We remain constructive on Malaysia, as the domestic market continues to be supported by the improving economy, strong FDI, corporate earnings growth, flushed liquidity and tourism rebound. In the short term, we may see stronger USD, and this will be positive to Malaysian exporters such as gloves, plantations, technology and selective industrial companies. In the longer term, there could be more market volatility from a Trump presidency.

Fund Review & Strategy

The Fund returned 3.04% for the month, underperforming the benchmark return of 4.62% by -1.58%. Year-to-date, the Fund returned 19.55%, outperforming the benchmark return of 14.57% by 4.98%. The underperformance in December was mainly due to underlying Fund's underweight position in the utilities and materials sectors. The Fund remains constructive on sectors that stand to benefit from thematic plays (NETR, NIMP, JS-SEZ). We will also maintain our core holdings in high dividend yielding stocks to anchor the Fund.

Tinjauan Bulanan

Pasaran ekuiti Malaysia menamatkan bulan terakhir 2024 dengan positif, dan Disember juga bulan positif buat KLCI sejak 10 tahun terakhir berturut-turut. Keadaan ini berlaku meskipun pelabur asing adalah penjual bersih pada Disember 2024 untuk bulan ketiga berturut-turut, menjadikan aliran keluar asing bersih terkumpul YTD sebanyak RM3.7 bilion, dan aliran keluar tahun kedua berturut-turut (2023: -RM2.4 bilion). Bulan Disember adalah bulan yang agak sepi. Penandatanganan JSSEZ yang dijadualkan pada 9 Disember 2024 telah ditangguhkan kerana Perdana Menteri Singapura dijangkiti COVID-19. KLCI merangkum dua konstituen baharu, Gamuda dan 99 Speedmart, bagi menggantikan Genting Malaysia dan Genting Berhad dalam indeks. Pada 2024, KLCI memperoleh 12.9%, iaitu keuntungan tahunan tertinggi sejak 2010. Indeks Syariah EMAS FBM menutup bulan pada 12,590.57, naik 4.62% bulan-ke-bulan (MoM). Indeks Syariah Bermodal Kecil FBM meningkat 4.17% pada bulan ini dan tidak mengatasi prestasi Indeks Syariah EMAS FBM.

Gambaran Bulanan

Januari 2025 boleh menjadi bulan yang tidak menentu. Pada awal tahun, kami dimaklumkan bahawa terdapat serangan kecil pegganas di AS, yang mungkin berkaitan atau tidak dengan pemilihan Presiden Trump. Pelabur dijangka kekal menepi menjelang 20 Januari 2025, iaitu hari pelantikan Presiden AS. Di peringkat domestik, Zon Ekonomi Khas Johor-Singapura yang ditunggu-tunggu sepatutnya dimuktamadkan pada 6 Januari 2025, dengan mesyuarat pemimpin kedua-dua negara, namun ditangguhkan kerana Perdana Menteri Singapura telah dijangkiti Covid pada Disember 2024. Aliran berita dari peristiwa itu sepatutnya positif buat Malaysia. Kami kekal konstruktif dengan Malaysia, kerana pasaran domestik terus disokong oleh ekonomi yang bertambah baik, FDI yang kukuh, pertumbuhan pendapatan korporat, kecairan yang mengucur dan pemulihan pelancongan. Menyorot jangka pendek, kita mungkin melihat USD yang lebih kukuh, lalu ia akan memberi kesan positif kepada pengeksport Malaysia seperti sarung tangan, perladangan, teknologi dan syarikat perindustrian tertentu. Meninjau jangka panjang, turun naik pasaran mungkin semakin tinggi berikutan pelantikan presiden Trump.

Tinjauan & Strategi Dana

Dana mencatat pulangan 3.04% pada bulan ini, tidak mengatasi pulangan penanda aras sebanyak 4.62% dengan perbezaan -1.58%. Sejak awal tahun sehingga kini, Dana menghasilkan pulangan 19.55%, mengatasi pulangan penanda aras sebanyak 14.57% dengan perbezaan 4.98%. Prestasi rendah pada bulan Disember disebabkan terutamanya oleh kedudukan kekurangan pegangan Dana Sasaran dalam sektor utiliti dan bahan. Dana masih konstruktif ke atas sektor yang mendapat manfaat daripada permainan bertema (NETR, NIMP, JS-SEZ). Kami juga akan mengekalkan pegangan teras dalam saham yang menghasilkan dividen tinggi agar menyangga Dana.
