The US Fed is likely to ease rates gradually starting with a 25bp cut in Sep given it is now confident that inflation risks have subsided. The debate is now on the pace and magnitude of the rate cuts. Asian currencies have recently strengthened vs the USD against this backdrop. The change in the Democratic Presidential candidate has shifted the dynamic of the US election. The outcome of the elections could have profound implications for Asian economies in terms of trade dynamics and geopolitical relations. India and ASEAN countries are likely to be more insulated and stand to benefit from supply chain shifts. China's economic expansion remains uneven, with export-led manufacturing growth compensating for weak consumption. Policy stimulus has been muted. The Target Fund Manager is in the midst of rebalancing their portfolio with the benchmark changes but intend to remain fully invested. They are positioned in the areas of a) broad-based exposure across India in consumption, industrials, healthcare, property, b) selected tech hardware names across foundry, phone components, IT services, software c) Ideas where return drivers are not major macro factors, e.g. ASEAN and global energy transmission, pharma. Malaysia's July manufacturing PMI reading fell to the lowest in 3 months at 49.7pts vs. 49.9pts in June. S&P Global witnessed a moderation in output and new orders, albeit only slight, and stemmed mainly from domestic front. Export orders rose for the 4th consecutive month and at the fastest pace since April 2021. Manufacturers also cited an increase in backlogs. Inflation was prevalent but firms were able to pass it on, while there was some job shedding as firms noted non-replacement of voluntary leavers. Firms remained cautious and scaled back purchases as well as inventories, but business confidence has started to turn up. The latest PMI data remains consistent with official GDP estimates.

Rizab Persekutuan AS mungkin akan mengurangkan kadar faedah secara beransur-ansur, bermula dengan pemotongan 25 mata asas pada September memandangkan ia kini yakin bahawa risiko inflasi telah berkurangan. Perbahasan kini adalah mengenai kadar dan magnitud pemotongan kadar faedah. Mata wang Asia baru-baru ini mengukuh berbanding USD berikutan perkembangan ini. Pertukaran calon Presiden Demokrat telah mengubah dinamik pilihan raya AS. Keputusan pilihan raya boleh memberi implikasi yang mendalam kepada ekonomi Asia dari segi dinamik perdagangan dan hubungan geopolitik. India dan negara-negara ASEAN berkemungkinan lebih terlindung dan mendapat manfaat daripada perubahan rantaian bekalan. Pengembangan ekonomi China kekal tidak sekata, dengan pertumbuhan pembuatan yang diterajui eksport mengimbangi penggunaan yang lemah. Rangsangan dasar telah menyepi. Pengurus Dana Sasaran sedang mengimbang semula portfolio berikutkan perubahan penanda aras tetapi berhasrat untuk kekal melabur sepenuhnya. Portfolio diletakkan dalam bidang a) pendahadaan berasas luas di seluruh India melibatkan penggunaan, perindustrian, penjagaan kesihatan, harta benda, b) saham perkakasan teknologi terpilih merentas faundri, komponen telefon, perkhidmatan IT, perisian c) Idea di mana pemacu pulangan bukan faktor makro utama, contohnya ASEAN dan penghantaran tenaga global, farmasi. Bacaan PMI pembuatan Malaysia pada Julai jatuh ke paras terendah dalam 3 bulan iaitu 49.7 mata berbanding 49.9 mata pada Jun. S&P Global merakamkan output dan pesanan baharu yang menyederhana, walaupun hanya sedikit, dan berpunca terutamanya daripada pasaran domestik. Pesanan eksport meningkat untuk bulan ke-4 berturut-turut di samping mencatat kadar terpantas sejak April 2021. Pengilang juga menyebut peningkatan dalam tunggakan. Inflasi berleluasa tetapi firma dapat menelusurnya, sementara peluang pekerjaan mengecil apabila firma menyatakan tidak menggantikan pekerja yang meletak jawatan secara sukarela. Firma kekal berhati-hati dan mengurangkan pembelian serta inventori, namun keyakinan perniagaan makin mengukuh. Data PMI terkini kekal konsisten dengan anggaran KDNK rasmi.
